

Join Our Team: Site Safety Representative at a Leading Engineering Contractor in Livermore, California

Are you an experienced safety professional looking to contribute to a dynamic, growing company? Mountain Cascade, a premier general engineering contractor based in Livermore, California, is seeking a skilled and dedicated Site Safety Representative.

About Us: Mountain Cascade has been a trusted partner in the construction industry for decades, delivering high-quality projects and innovative solutions. We pride ourselves on a collaborative work culture and commitment to excellence.

Position Overview: The Site Safety Representative (SSR) will serve as the on-site safety authority for a pump station construction project for the San Francisco Public Utilities Commission during the months of May to September. During months of September to May, the SSR will work on various projects throughout the Bay Area.

The SSR must have demonstrated experience with pump station or similarly complex utility infrastructure projects and be capable of adapting safety controls as site conditions, sequencing, and scope evolve.

Start Date: May 1, 2026

Responsibilities:

- Perform daily inspections of active field work area(s) covering workplace conditions, physical facility safety, and employee work practices. Document of any deficiencies and corrective actions
- Attend required City Representative meetings
- Conduct “toolbox” safety meetings per CAL/OSHA standards and conduct monthly safety committee meetings
- Establish the specific and appropriate levels of protection for each work task and include within the AHAs/JHAs
- Implement and enforce Health and Safety Plan and any other safety plans required for the scope of work

Qualifications:

- Formal documented safety training as required by CAL/OSHA or other state regulations of the following:
 - OSHA Training:
 - OSHA 30/OSHA 500
 - Fall protection
 - Material Handling
 - Confined Space
- First Aid/CPR within the past two (2) years

- Trained (formal, documented training) and experienced in the hazards and complexity of working on a pump station
- 5 years of Construction Project Safety Management experience on similar projects or CSP with experience in construction related projects

Salary: \$100 - \$140K

Work Environment

- Full-time, on-site construction environment
- Outdoor work conditions with active construction operations
- Regular interaction with field crews, project management, and agency representatives

Why Mountain Cascade

- Work on critical public infrastructure projects
- Safety-first culture with leadership support
- Opportunity to apply expertise on complex, high-profile work

How to Apply

Qualified candidates are encouraged to submit a resume highlighting relevant project experience and certifications to hr@mountaincascade.com
